Vision Wholesales Distribution

Integrated platform for B2B Distribution

Vision Wholesales Distribution

Integrated platform for B2B Distribution

End-to-end Workflow: Sales - Customer Order – Provider Order and Delivery - Customer Delivery.

Customer Self Service Portal: B2B customers can inquiry stock products, get offers and submit orders.

Providers Management: Optimize providers orders in direct correlation with customer demand, follow providers orders delivery.

Warehouse automation: the products are tracked with bare codes since reception until delivery. The reception and delivery is fully automated and digitalized.

Barcode Reader dedicated application: specific application available for barcode readers allowing real-time matching order or offer items directly on field, while receiving or delivering activities.

Sales pricing engine: prices are approved based on predefined fees according with customer and product type.

Back Office staff efficiency: real time data access, approval workflows.

Real time reports and dashboards: based your decision on real-time data analysis.

Integration: out of the box integration with ERP systems

B2B Customer Self Service Portal

Your B2B customers will be able to check products availability and price, ask their questions, request offers and submit orders. Enable your sales force to forecast customer demand and optimize stocks.

Vision Wholesale Distribution B2B Customer Portal

- Customer profile
- Offer request
- Offer
- Orders
- Stock availability with shopping cart
- Automation
- Reports

Customers can update their own profiles, request offers, view their order history, check their order status and place new orders around the clock.

Automatized Sales and Purchase Process Workflow

Feedback

The customer can add specific feedback regarding interaction with the distributor, including specific documents.

Stock

Visualize stock and add items in the shopping cart to further transform it into offer request

Reports

Access all your commercial activity with the distributor in one-place.

Notifications

Get notification regarding an offer request response submitted, offer approval, delivery date changing, etc.

Vision Wholesales Distribution\ Customer Portal

 VISION

Automate the sales process and optimize the demand and supply lifecycle. Focus on what your customer needs avoiding wasting time and resources.

The image displays a web application for 'vision Wholesale Distribution' in both desktop and mobile views. The desktop interface features a top navigation bar with the company logo and a menu of options including 'Client', 'Oportunitati', 'Clienti', 'Clienti Noi', 'Cereri Oferte', 'Oferte', 'Comenzi Ferme', 'Comenzi Confirmate', 'Stoc', and 'Raportare'. Below this, there's a 'Client nou' section with a dropdown for 'Filiala responsabila' (set to 'Bucuresti') and a text field for 'Cod intern' (set to '22-AS-89976'). To the right, an 'Utilizatori' table lists users: 'sales@vision.ro' and 'daniel.matea@accender.ro', both with a creation date of '8/10/2019'. The main content area is divided into two sections: 'Produce cerute si neofertate' and 'Produce cerute si partial ofertate'. Each section contains a table with columns for 'Nume', 'Numar Cerere', 'Articol', 'ItemKey', and 'Cantitate Ceruta'. The 'Produce cerute si neofertate' table has 4 rows, while the 'Produce cerute si partial ofertate' table has 4 rows. The mobile interface, shown on a smartphone, mirrors the desktop layout but with a sidebar menu on the right for navigation and a bottom bar for pagination and search. The status bar at the top of the phone indicates the time is 10:30 and the battery is at 78%.

Vision Wholesale Distribution Sales and Client Management

- Customer management
- Opportunities
- Offering
- Sales fees administration and offer workflow
- Ordering and delivery
- Stock
- Demand and supply optimization

From customer product inquiry to delivery: manage in real time offer request from your existing customers, create opportunities and respond to customer offer request, administrate customer orders and delivery.

Demand and supply analytics in terms of (non/)requested vs (non/) offered products, product lifecycle traceability, etc.

Offers and Opportunities

Key Features

Opportunity

Create and track opportunities based on real time products data: stock vs spot, product rotation speed, delivery date, margin, weight and prices.

Offer requests

Manage customers offer requests: automatically respond with offer for requested products

Offer

Custom workflow covering all phases: from offer initiation until order is confirmed. Real-time information is available at any step: payment term, credit limit, customer details, product list and commercial terms. Base your product pricing on accurate data available on screen while a product is added: last selling price, list price, last sale date, availability (at warehouse level), sales approval level

Offering real time analyzer tool

The product level analyzing tool enable the sales responsible to base decision on accurate and real time data:

- Requested and unoffered products
- Requested and partially offered products
- Requested and offered products

Customer stock inquiry

Sales Workflow and Customer Management

Key Features

Sales Fees Administration

Define thresholds for sales approval workflow based on complex parameters: product type, customer type, sales volume, history, etc.

Pricing Administration

Define pricing policies at item level by defining the (min/max) margin, type and other relevant information

The sales offering engine is based on various parameters enabling sales automation with increased control: Potential, Discount Level, Industry Coefficients, Product Coefficients, etc.

The screenshot displays the 'Coefficients administration' section of the Vision Wholesale Distribution software. It features four tables for configuring various coefficients:

Sales	1	2	3
Potential			
A	12 %	2 %	3 %
B	12 %	0 %	5 %
C	88 %	60 %	6 %
D	5 %	8 %	58 %

Level Approval	PM	CSO	CEO
Potential			
A	0 %	50 %	99 %
B	3 %	9 %	15 %
C	12 %	30 %	40 %
D	6 %	13 %	20 %

Industry	Coefficient
Automotive	2 %
Shipyards	3 %
Aerospace	5 %
Railway	1 %
Oil, Gas	1 %
Power & Energy Industry	1 %
Infrastructure	7 %
Machinery & Equipment Manufacturing	1 %

Product Type	Coefficient
FM	4 %
SM	1 %
NM	3 %

The screenshot shows the 'Client Management' section of the Vision Wholesale Distribution software. It includes a form for adding a new client and a table for managing users.

Vision Wholesale Distribution Automatized Warehouse Management

- Reception Management (IN)
- Delivery Management (OUT)
- Automatized IN/OUT Activities
- Stock Management

From cost approval to purchase and pay: the Provider module is covering the entire lifecycle of cost planning, sourcing, contracting, delivering and payment. Complex features and customizable workflows enable your company to control and automate the cost related processes.

Procurement or Sourcing module covers the entire lifecycle of RFx acquisition process and is fully integrated with Providers, Contracts, Product Catalogue, Expenses, Orders and Invoices modules.

Provider's management module covers the entire lifecycle of suppliers, achieving a 360° view of its data: General Information, Contracts, Expenses, RFx, Orders and Invoices.

Automatized Reception and Delivery Process Workflow

Warehouse Automation

Key Features

Reception

Control your providers delivery based on automatic identification of ordered items versus delivered items using handheld device with custom application. Generate barcode labels for each item and attach the manufacturing specs in order to enable full traceability of items,

Delivery

Control the products delivered to your customer by automatic identification of the delivered items versus leaded items using handheld device with custom application, with full traceability

Stock

Keep real time track (identified products, loaded products, delivered product) of your stock

The screenshot displays the 'Add certificate' form in the Vision Wholesale Distribution Warehouse Automation system. The interface includes a top navigation bar with the Vision logo, 'Warehouse' tab, and links for 'IN', 'OUT', 'Buyers', and 'Search NIR Items'. A user profile 'Administrator' is visible in the top right. The form is divided into two main sections: a left sidebar for account details and a main content area for item and invoice information.

Account Details (Left Sidebar):

- AccountKey
- CUI
- Fiscal code
- Address
- Country
- City
- Bank
- Account
- Phone

Invoice and Item Details (Main Content Area):

Invoice number: [Field]
VAT: 19
NIR creation date: 9/6/2019
Last save date: 9/6/2019
Warehouse: Bucuresti
NIR / DVI: [Radio buttons]

Item Table:

Item code	Item name	U/M	Amount	Weight	Quality	Price	Value	VAT	Charge	Lot
220TK0093	Welding rod AISI 5 2.40 mm	KG	5	5	S355JR/J2	67	335	63.65	2342	1
AUTO	AUTO. FORD FIESTA B 36 SNY - WFOJXXGALJBS39562	BUC	0	0	S355JR/J2	90000	0	0	32	1

Handheld specific application

Automatize product receiving: mark the received products vs provider order and automate generate documents. Real time update of the provider order reception status.

Control the delivery:

- Item status (identified, prepared for delivery, loaded, delivery)
- Full product traceability: attach production certificates at product level
- Update stock

Full life-cycle product traceability:

From provider order to warehouse reception and to further customer delivery, keep track at item level, of each item details: fabrication charge documentation, reception details, provider order, customer delivery, etc....

Vision App Maker

Architecture

- Omnichannel (external/internal portal, mobile, infokiosk)
- Public API access
- Internal and external purposes configurable topology

Vision App Maker is a turn-key, integrated framework designed on a modular, cloud and decoupled architecture, compliant with the highest security and availability requirements.

Vision App Maker Suite

Technology Stack

Vision App Maker components were developed with modern and appropriate technologies for each layer purpose: reliable back-end developed in .NET Core and flexible, responsive and rich front-end based on Java Script, React and Angular.
